

binderholz Seminar 2018

Cost effective Urbanization using BBS Cross Laminated

binderholz solutions are cost effective and sustainable using modern methods of manufacture using solid wood. The need to increase housing in our inner cities can be solved using BBS cross laminated timber and glulam engineered products. binderholz can support its customers worldwide with its extensive resource in knowledge, product testing and technical expertise including qualified engineers, structural engineers and technical draughtsmen who can provide competent support in all aspects of structural engineering and construction, building physics and fire protection. When it comes to specific project solutions we can support and test to achieve the required results.

Our Seminar will deal with the subject of using solid timber for an effective fast and cost effective solution in multi-storey new buildings, and for extensions in existing buildings. Structural-physical properties of massive timber construction, tested and certified construction structures, real-life examples and a look at international solid wood projects are treated as central topics of the lecture series.

Thursday, 15th February 2018

Íþróttasvæðið Kaplakrika 220, Hafnarfirði | Iceland

- 13.45 pm Coming together, registration
- 14.00 pm Opening and warm welcome
Ingólfur Á. Sigbórsson | Strúktúr ehf.
Ing. Arthur Walch, M.A., M.Sc. | Sales Director CLT BBS
- 14.15 pm Start binderholz Seminar
Ing. Patrick Rehr, B.A. | Sales binderholz
- 14.30 pm Building in wood in Iceland from the architects point of view
Architect Sigurður Einarsson | Design Manager FAÍ / FSSA Batteríð
- 15.00 pm Why building in massiv wood in Iceland
Jón Þór Jónsson Byggingafræðingur | Project Manager SA Verk
Jón Rúnar Halldórsson | Owner Fornubúðir ehf
- 15.45 pm Support for engineers and architects with the latest R&D for the use of CLT BBS
Ing. Arthur Walch, M.A., M.Sc. | Sales Director CLT BBS
- 16.00 pm Short break
- 16.15 pm Wooden architectur in detail
Architect Sveinn Bjarki Þórarinnsson FAÍ | Batteríð
- 16.45 pm From concept to approved solutions and international projects with CLT BBS
Ing. Arthur Walch, M.A., M.Sc. | Sales Director CLT BBS
- 17.00 pm Open questions, close of the seminar
- 17.15 pm Flying snack
- 19.00 pm Closing
